-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

1. Applicant's election with traverse of species a) figures 1-7, claims 1-23 in the reply filed on August 3, 2005 is acknowledged. The traversal is on the ground(s) that would have not be an undue burden to the examiner to search for both species. This is not found persuasive because it would have been a burden for the examiner to search for both species.

The requirement is still deemed proper and is therefore made FINAL.

Drawings

2. The drawings are objected to because
- on page 12 line 12, reference numeral "34" is not shown in figures 1-7;
 - on page 16, line 5, reference numeral "58" is not shown.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Specification

3. The disclosure is objected to because of the following informalities: on page 16 line 1, the use of reference numeral "48" is incorrect. Appropriate correction is required.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

5. Claims 1, 2, 8-10, and 13 are rejected under 35 U.S.C. 102(e) as being anticipated by Woehr et al (US 6,623,458).

Woehr discloses a needle shield (figs. 3a-3c) including a shield 16, an outer bearing 14, an inner bearing 50, a wedging portion 94a-b, and a tether 18.

Allowable Subject Matter

6. Claims 3-7, 11, 12, 14, 15, and 16 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

7. Claims 17-23 are allowable over the prior art of record.

8. The following is a statement of reasons for the indication of allowable subject matter: the art of record does not teach or render obvious the wedging portion including a cam surface which engages a sidewall of the outer bearing to pivot the wedging portion when the inner portion is moved along the longitudinal axis, the outer or inner bearing including a latching arm, the planar surface being hingedly attached to the outer

bearing, the needle including a 90 degrees angle, the hub including a winged portion extending therefrom for gripping.
